

Biography:

Edmund Eswein graduated from University of Applied Sciences in Osnabrück with a Diploma in Mechanical Engineering in 2006. Hereafter he joined Schlumberger and trained as a Field Engineer in Matrix and Fracture Stimulation in Germany. After gaining hands-on field experience, he moved to a new role as a Design and Evaluation Service Engineer for fracturing, working on exploration and development projects in carbonate and sandstone formations. In 2012 Edmund moved to Poland where he expanded his experience in unconventional reservoirs. Since late 2013 he acts as Lead Production Stimulation Engineer in Continental Europe, successfully introducing new stimulation techniques such as channel-fracturing, propped fracturing in ultra-high HPHT gas wells, and is actively involved in development of environmentally friendly fluid solutions for the European fracturing market.
