

George Galloway

Bio

George Galloway is an Advisor with Well Academy and Technical Consultant with the International Well Control Forum (IWCF). In 2012 he co-founded The Well Academy and co-developed team-based scenario training integrating human factors. After establishing Well Academy in the Netherlands as a specialist wells training centre, he helped grow the business into a global training provider with centres added in USA and Australia. In 2021 George transitioned into his current advisory role and now provides independent consultancy services. George has led the IWCF Well Intervention Taskforce during which time significant improvements were made to the Well Intervention Pressure control curriculum.

Abstract

Presentation Title: Well Integrity Risks Across the Well Lifecycle

The presentation will define the view of well integrity risk across the well lifecycle, provide a perspective on the consequential risk of well integrity failures, examine how training can reduce well integrity risk across the well life cycle, and provide suggestions as to what can be done to ensure well integrity risk is managed effectively.

Specifically share experience with:

- Well Control in Design and Lifecycle Management Training
- The importance of Human Performance & Incorporating Human Factors into Training
- Learning from Incidents and what Follow Up Actions can we take away.
